Visions™ Glass Like

Glass is synonymous with clarity, light and openness, with visions™ edgebandit achieves the unique appearance of real glass using lightweight, robust polymer. We create the illusion of depth by applying a decorative print to the underside of transparent PMMA material. When this material is radiused or beveled, it diffuses light in the same way as real glass. By combining vision edgeband with matching boards or laminates, you can achieve the appearance of a real sheet of glass.

NEW!

Available Colors: White, Mint, Sky Blue, Ice Blue

Sizes

23MM x 2MM
45MM x 2MM

Magic Metallic

Using various combination of genuine aluminum edgeband and polymers, Magic™ Metallic edgeband achieves the look and feel of metal banding without its processing drawbacks. The magic collection, offered in aluminum and stainless steel finishes, includes metallic surface, translucent and magic creativo™, a twin level solid or printed surface with metallic overlay.

NEW!

Many more colors and sizes available. We can match virtually and laminate color, call us today!
